

THE BEVERLY WILLIS ARCHIVE GUIDE AND BOX INVENTORY

Preface

The Beverly Willis Archive and its inventory contains images, information, press (print, TV videos, and project videos), and original drawings, art, writing and film works of Beverly Ann Willis (b. 1928), as well as materials that inspired her, and material of personal importance. Files in the boxes include those from her early professional years in Hawaii to her time as founder and principal at Beverly Willis and Associates Architects, as well as recent activity such as R.Dot, the Rebuild Downtown Our Town initiative for the reconstruction of the World Trade Center Site after 9/11. Personal photographs and information from Willis's childhood and adult life are also included.

The archive contains 30 boxes described in the contents list below. Each box is numbered from 1 to 30 and is designated a category or categories of content. Boxes 1 to 20 contain file folders, and project and personal data is designated and divided within the file folders. Boxes 21 and 22 contain videocassettes of TV news programs, in-house sales and promotion, and self produced films about Beverly Willis and her projects. Box 23 contains oversized folio files of the archive, mostly original plans and blueprints. These documents are listed in the inventory under the project name and number. Box 24 contains large size copies of original pen and ink architectural drawings too large to fit in legal file folders. Boxes 25 to 30 contain digital media materials including optical discs, audiocassettes, videocassettes of various size, and ZIP drive disks.

The inventory below lists the contents of these boxes and their folders, including the number of folders per project. Archive material is coded by type using roman numerals, whether it be written information, drawn plans, photos, slides, press and articles, or videos [see page 2 for key]. Dates and locations of projects are also included where known or applicable.

Boxes 1-13 contain a range of materials pertaining to Beverly Willis's architectural and consulting projects from her San Francisco office period on, since 1958. These architectural projects are ordered alphabetically. The project names can be derived from the client name(s), the location of the project, the type of project, or the project title designated in the searchable online project list at BeverlyWillis.com. Box 10 also contains production information for the BW short documentary film "Built for Ballet" (2011), about the construction of the San Francisco Ballet Building in 1984.

Box 14 contains materials pertaining to industrial design projects Willis did in her early career when based in Honolulu, Hawaii, between 1954 and 1960. These projects are ordered by project number, which is described in more detail in the following paragraph. Box 14 also contains information, publications, and staff photographs that pertain to the architectural firm, Beverly Willis and Associates Architects. Included in this is a file about Rueger and Associates Architects, which merged with Beverly Willis and Associates in 1971. More information on the Rueger and Associates merger can be found in the Box 14 listing under Rueger and Associates on page 54 of this document.

Each of Beverly Willis's architectural and industrial design projects from both the San Francisco and Honolulu offices have been assigned a four-digit project number. The Hawaii Office project numbers begin with 0001 and projects from the San Francisco Office on begin at 0100. Projects that were executed in phases have more than one project number. There is a two-year overlap between the opening of the San Francisco office and the closing of the Honolulu office, between the years 1958 and 1960 when Willis was commuting between offices and completing projects from both offices. A listing of all projects numbers, project clients, types of projects, and their locations can be found on the BeverlyWillis.com website.

Box 15 contains originals, photographs, correspondence and press for Willis's art and industrial design projects. The art projects are ordered by three-digit project numbers beginning with 000. Box 15 also contains production information for the BW short documentary film "The Art of Beverly Willis" (in production as of March 2012), about Willis's early career as an artist and industrial designer.

The remainder of the paper file boxes are divided by the broader categories B.W. Writings, Publications and Invisible Images; R.Dot, Architecture Research Institute and press article copies; Images and Travel; Correspondence, Libraries and Lists; and Personal Life. Subdivisions of these files are generally ordered alphabetically or by relevance.

Videos in boxes 21 and 22, which are divided into sub-boxes distinguished with alphabetical labels, A and B, are ordered alphabetically by project name, which can again be titled by location, client, or project type.

The folios in Box 23 are stacked vertically, ordered from top to bottom by file size, then alphabetically by project name. It includes architectural projects, award nomination folios for architectural projects, and creative writing and poetry works with art style photographs.

Box 24 contains a *limited* selection of oversized original pen and ink architectural drawings and copies of original project material. The sheets for each project are ordered by project number and contained in 17" x 22" manila envelopes.

Boxes 25 and 26 house optical discs (CDs, DVDs, etc.) and are divided into sub-boxes distinguished with alphabetical labels, A and B. Box 25A contains discs written with file documents pertaining to architectural projects listed by project number, The Architectural Research Institute (ARI), memoirs, UC Berkeley Bancroft Library Oral History Office, Archive Interviews in text, and The Beverly Willis Architecture Foundation (BAAF), while Box 25B holds discs of images and PowerPoint presentations. Box 26A houses discs with computer and printer applications and software, as well as reference materials that are not BW's work, while Box 26B contains discs relating to film projects and beverlywillis.com.

Box 27 contains archive interview DVD videos from the University of California Berkeley Bancroft Library Oral History Office, and is organized by date.

Box 28 is divided into three sub-boxes, 28A, 28B, and 28C. 28A holds audiocassette tapes of Rebuild Our Town Downtown (R.Dot) committee meetings, organized by date, which extend into Box 28B. Box 28B also includes audiocassettes relating to Architecture Research Institute projects, memoir and oral history recordings, and BW's Montgomery Lecture at Dartmouth College. Box 28C holds miscellaneous dictations on mini cassettes, as well as "Legacy" audiocassettes.

Box 29 contains videocassettes of various sizes, and is divided into two sub-boxes, 29A and 29B. 29A houses MiniDV videocassettes of archival interviews from the University of California Berkeley Bancroft Library Oral History Office, organized by date, and 29B holds various Video 8 format cassettes.

Box 30 is separated into two sub-boxes, Box 30A and Box 30B, and contains ZIP drive disks storing files pertaining to architectural project presentations, Rebuild Our Town Downtown (R.Dot), Invisible Images, oral histories, website set-up, and the Architecture Research Institute (ARI).

All original BW architectural plans and drawings – as well as a small selection of photos, videos, and brochures – are archived at Virginia Tech in Special Collections titled Beverly Willis Architectural Papers, 1954-1998, Collection Number Ms92-019. Please see the Virginia Tech website for the "Complete Guide to the Beverly Willis Architectural Papers", address <http://ead.lib.virginia.edu/vivaead/published/vt/viblbv00072.xml.frame>. Contents of the Virginia Tech Archive "Complete Guide to the Beverly Willis Architectural Papers" do not include quantities of specific material (i.e. photographs, presentation drawings, project descriptions, etc.) for a number of projects and/or boxes. Contents are ordered by project number and six other sections: Publications; Brochures and Clippings; CARLA Records; Miscellaneous Project Papers; Presentation Documents; Ephemera; and Beverly Willis Media (two videos produced in 1985). The Virginia Tech listing does not include all BW projects; *it includes only projects for which Virginia Tech has material in its collection*. There are listings for projects that are not within the BW Archive as of 2012. With some exceptions, there are no project descriptions. Images cannot be accessed digitally from the Virginia Tech's Complete Guide. However, over 600 digital images of BW projects and BW are available on the Virginia Tech Library's Image Base website, address http://imagebase.lib.vt.edu/browse.php?folio_ID=/iawa/willis.

BeverlyWillis.com is also source for more project detail, description information, and digital images.

The Key to the material filed in the BW Archive file folders is as follows:

Key

- I. Project Description, Correspondence, Applications
- II. Site Information, Plans
- III. Renderings, Drawings
- IV. Photographs and Negatives
- V. 35mm Slides
- VI. Press Release, News Clippings, Published Articles, Ephemera

Organized by Date—Most recent to Oldest, Further organized by Author

Beverly Willis publications can be filed with referenced projects or in Box 16 with B.W. writings.

- VII. Videos, DVDs, CDs, Audiocassettes, ZIP drive discs
 VIII. Oversized Individual Project Files

The inventory table of contents is listed below on pages 2 through 10 of this document. It lists projects and categories by box and includes the page number on which the box's inventory description begins.

CONTENTS OF BOXES

VII. Video—in BOX 21B

“Beverly Willis Architect—Natures Images.” In-House Promotion.

CHARLES RUEGER AND ASSOCIATES:

Rueger and Associates, an architectural firm in Tacoma, Washington, merged with Beverly Willis and Associates Architects in 1971. Charles Rueger, who had inherited the firm from his father, closed the Rueger office and joined Beverly Willis and Associates as an associate and Vice-President. His single employee, Gary Johnson, also joined the Willis firm at that time. Charles’s father was a well-known Tacoma architect and specialist in educational facilities. Charles Rueger sometimes used photographs from his father’s firm to represent his background.

Art Projects Inventory Categories:

Drawings: Project # 000-060, 119-120

Sketchbooks: Project # 061-062

Frescos & Murals: Project # 064-073, 114

Furniture: Project # 074-076, 095, 122, 123

Paintings: Project # 077-091, 110-113, 118, 121

Oils: # 78-89, 91, 118, 121

Watercolors: # 90, 110-113

Multi-media & Sculpture: Project # 092-094, 096-106

Signs: Project # 107-116, 117

Industrial Design: See WILLIS ATELIER – EARLY HONOLULU PERIOD in Box 14

Later Additions to Archive – Project #117-123 relate to a combination of frescos, paintings, and signs that were discovered and introduced after the original project numbers were assigned. This is the reason why these numbers are not sequential.

Photographs of art in the making (originals) are filed under “Images of BW at work – Art & early years”. There are copies of these photographs in the project specific files with reference to the aforementioned original file location.
